LA MIA LEVA

La mia leva è una leva di primo genere costruita in Lego.

Ha come fulcro la ruota, ha il braccio della potenza più lungo di quello della resistenza, è dunque vantaggiosa:

consente di sollevare grandi pesi con un minimo sforzo.

Agganciando all'estremità di sinistra una resistenza (blocchetto marrone) e applicando una piccola forza all'estremità di destra, il blocchetto si alzerà grazie all'effetto leva, svolto dal braccio della potenza, che amplifica la forza applicata.
